About the HEAT Index:

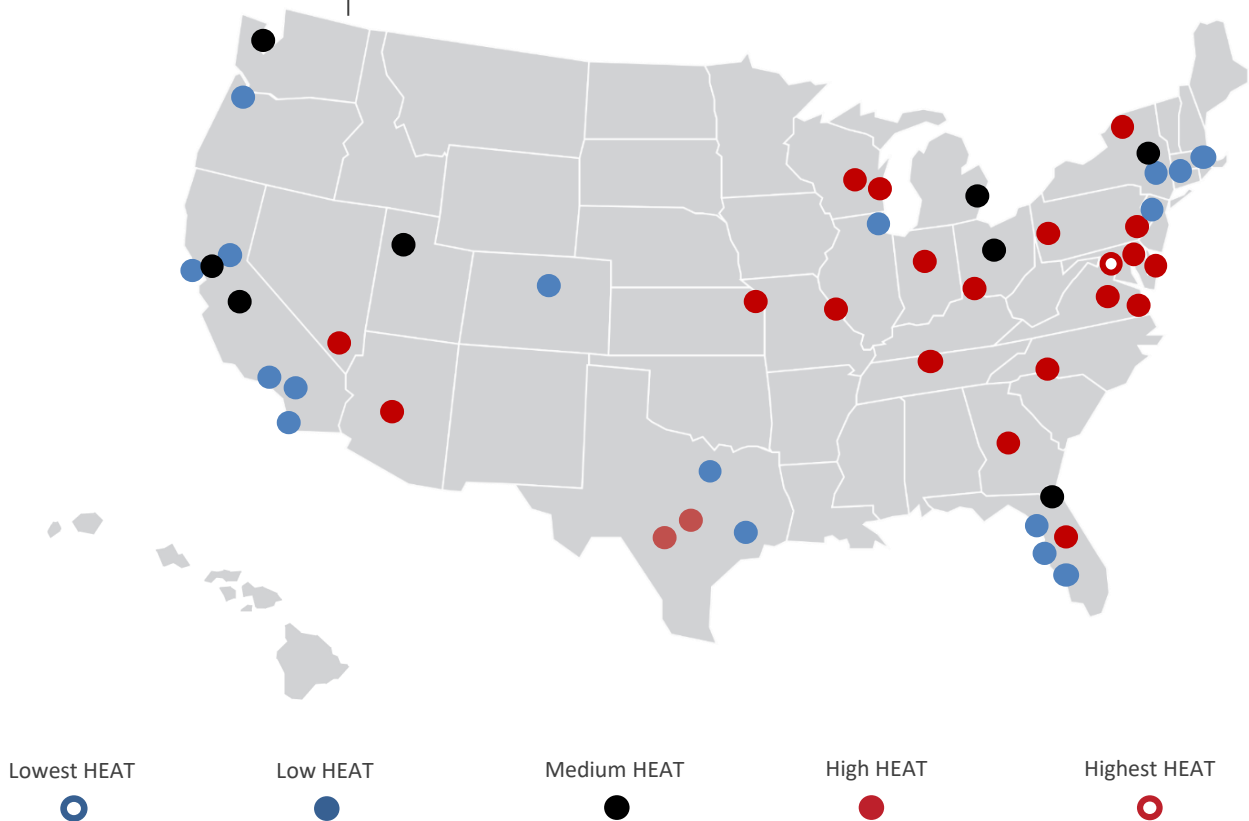

The Real Estate HEAT (Housing Experts Anticipating Trends) Index is a monthly leading indicator of nearly 40 housing markets in the U.S.

Five Star Professional partners with thousands of real estate agents who complete a weekly survey about the conditions they are observing in their marketplace.

The HEAT Index has a midpoint of 50, this means the market is neither hot nor cold.

A higher Real Estate HEAT index is correlated with:

- Rising buyer traffic
- A seller's market
- Rising home prices
